iBMACS®

Compliance Solutions at the Touch of a Button

Compliance is essential to all financial institutions and can help you to improve the way you do business. But when new policies and guidelines are regularly being introduced and updated for the insurance industry, how can firms stay on top?

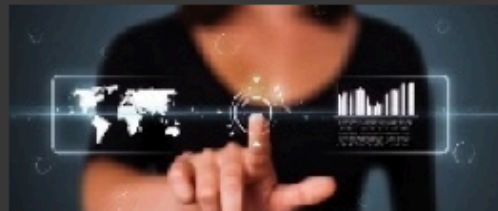

iBMACS is a web based solution that can enable every broker to achieve and maintain compliance.

iBMACS enables users to fully understand FSA rules and regulations.

Written in clear English, iBMACS has over 20 components; covering broker management, regulation management and client management.

The functionality allows you to:

- Enter applicable records
- Instantly see records that are compliant and non-compliant
- See an overview of compliance by key areas
- View and modify previously created records
- See an audit trail for each record from date of creation
- Store supporting documentation (e.g. TOBAs, BCPs)
